WETROOMS & GLASS

NOVELLINI

Contents

What is a Wetroom?

At Novellini we understand that you desire something more individual than just a shower room. That's why we've created a comprehensive wetroom and glass collection that features a range of both stylish and practical solutions for your home.

Our wetrooms offer all the benefits of a walk-in shower, combined with the protection offered by a shower screen or enclosure, allowing you to create a contemporary, luxurious feel to any bathroom.

Using the available space in an efficient and uncluttered manner allows you to create a truly individual showering experience, limited only by your imagination.

Peace of Mind
Our designers and engineers work with one common goal: to design and manufacture wetroom solutions that are fully integrated. From the hidden technology under the wetroom floor, to our beautifully designed glass screens and enclosures.

Lifetime Guarantee
All of our wetroom products are covered by the Novellini Product Lifetime Guarantee. Our guarantee is valid only if used with Novellini products and does not cover installation.

The Complete Package
We offer wetroom solutions for both timber and concrete floors with all systems encompassing the four key components of a wetroom:

1 Gradient

2 Drainage

3 Waterproofing

4 Glass

Key aspects of a Novellini Wetroom

1 Gradient

It is important to ensure that the floor of a wetroom has sufficient gradient in order for the water to drain away without forming puddles. Our system offers a choice of pre-formed, engineered slopes guaranteeing a perfect gradient every time.

2 Drainage

Whether you desire a contemporary linear drain or a more traditional square outlet you need to be sure that the drain is capable of taking away sufficient water to keep up with the flow from the shower head. Our drains offer the choice of an additional trap, therefore ensuring sufficient drainage is available.

3 Waterproofing

It is essential to ensure your wetroom if correctly waterproofed. All of our membranes are easy to apply and are backed up by our Lifetime Guarantee, offering complete peace of mind.

4 Glass

Our range of screens and enclosures offer almost unlimited choice, from the simplicity of a single screen right through to our full enclosures and multi-screen options.

Choosing your floor style

The secret to a successful wetroom

The Wetroom Deck

Our range of preformed decks have been developed specifically to allow the installation of a wetroom onto a timber floor, which are quick and easy to install. Each Deck has a built-in gradient that flows towards the stylish drain to create a perfect wetroom every time.

Choose from:

Mono Deck - One way fall
Duo Deck - Two way fall
Quattro Deck - Four way fall

For Concrete Floors see pages 22-29

Mono Deck - One way fall for large format tiles

Grills available in multiple finishes

Benefits of the Mono Deck

The Mono Deck is a single slope wetroom system for timber floors, allowing the linear drain to be positioned neatly against the wall. Fewer tile cuts and large tiles ensures a stylish finish.
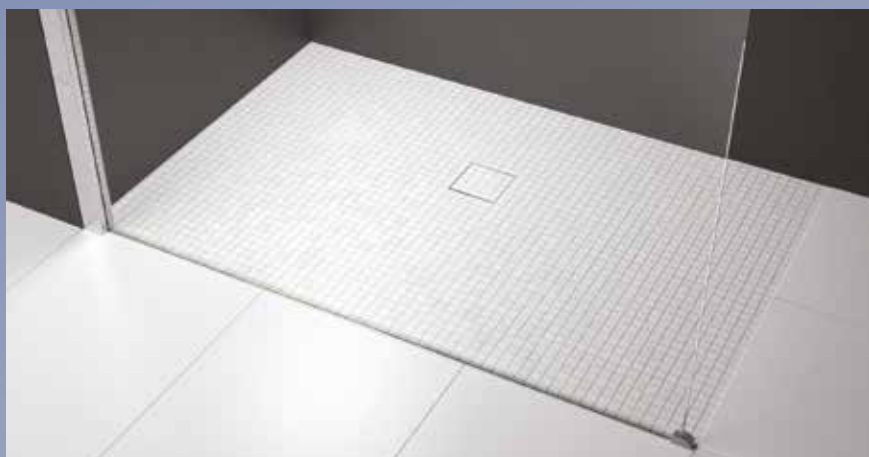

Duo Deck - Two way fall for large format tiles

Benefits of the Duo Deck

The Duo Deck, with its contemporary linear drain, is perfect for 'large format' tiles, as there are fewer tile cuts required and hence fewer grout lines.

Quattro Deck - Four way fall for mosaic tiles

Benefits of the Quattro Deck

The Quattro Deck, with its more traditional square drain, is better suited to smaller 'Mosaic' tiles as the tiles blend more sympathetically into the shape of the Deck.

# Choosing a layout to suit your room

Corner, alcove or wall layout?

Selecting a layout

The layout of your shower room will determine the glass option required. Typically this will be either a Corner, Alcove or Wall Layout. For the Corner Layout we provide a range of options from the minimalist single panel to the complete enclosure. For the Alcove there is a choice of either a minimal screen with pivot or a single door (with a fixed panel if required). For the Wall Layout we provide a choice of fixed screens with optional side panels.

How wide should a screen be?

To keep water within shower area A, a minimum of 100cm is acceptable, but 120cm would be preferable. Your glass choice will also be affected by area B which is the amount of aperture you need to enter the shower area. If space is limited, a Kuadra H2 (p27) screen with pivot offers a smaller fixed panel with enhanced shielding.
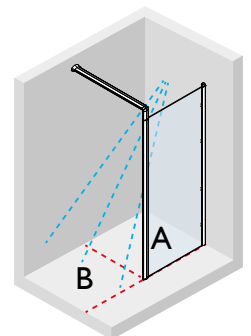

1. Corner Layout

For simplicity, select a single glass screen (Kuadra H) but ensure the width of the screen is sufficient to contain the water spray. For more control, choose a screen with a pivot (Kuadra H2) which deflects more water back into the shower area.

Combine screens to form your (Multi-screen) enclosure or choose a Young enclosure to completely contain the water and retain heat within the shower area.
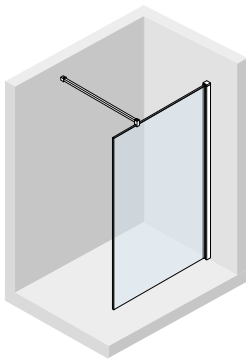

Single glass
Kuadra H
See p31
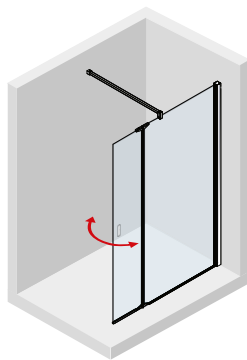

Screen with pivot
Kuadra H2
See p31
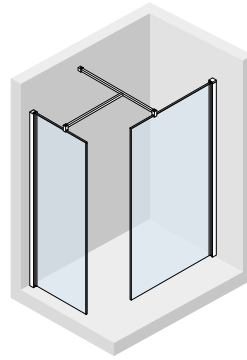

Multi-screen
Kuadra H with H or H2
See p31
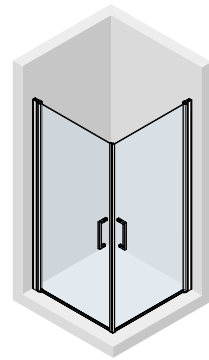

Enclosure
Young
See p36

2. Alcove Layout

Where your shower area is within an alcove, we provide a minimal screen with pivot (Kuadra H2) or a single door (with fixed panel if required) (Young).

Timber Floor - **Guidelines**

The Novellini wetroom for Timber Floors

Introduction

Our range of pre-formed shower Decks has been developed specifically to allow the installation of a level access wetroom on a timber floor.

Available in a range of sizes, the Deck has a pre-formed engineered slope, ensuring that water from the shower is directed towards the integral drain, guaranteeing a perfect gradient every time.

Novellini Wetroom floor systems can be installed with electric underfloor heating (max specification 150watts/ sq metre).

Typical timber floor build-up - Duo Deck

The Drain and Deck are supported by plywood held in place between the floor joists by battens.

The Deck is covered by a self-adhesive waterproof membrane supplied as a Floor Membrane Kit.

The wall is sealed with a waterproof Wall Membrane.

The internal corner of the wetroom is protected using a Pre-formed corner, while the wall-floor horizontal joints and wall-wall vertical joints are sealed with reinforcing tape.

Three simple steps to order your Timber Floor solution

Flow rate up to	Flow rate up to	Flow rate up to
68 L/min	41 L/min	24 L/min

Mono Deck
One-way fall with linear drain

Duo Deck
Two-way fall with linear drain

Quattro Deck
Four-way fall with square drain

1 | Deck & Drain

The preformed engineered slope on all Decks guarantees a perfect gradient every time.

Choose either the Mono Deck or Duo Deck for large format tiles, or the Quattro Deck for mosaic tiles.

Each Deck features a multi-directional trap for ease of installation.

For Mono and Duo Decks, additional traps can be added to increase the flow rate.

Tilesure
Floor Membrane Kit

Floorsafe
Floor Membrane Kit

2 | Floor Membrane Kit

It is essential to ensure your wetroom is correctly waterproofed.

Choose from either a Tilesure or Floorsafe Kit. Both Kits comprise a Floor Membrane, Primer, Pre-formed corners and Reinforcing Tape.

Wallsafe

3 | Wall Membrane & Tape

Use Wallsafe to waterproof the walls within and around the shower area.

Use Reinforcing Tape for sealing critical Wall-Wall and Wall-Floor joints.

Ensure the correct Tape is used with the appropriate Floor Membrane Kit.

For full details of waterproofing for timber floors see page 20-21.

* All of our wetroom products are covered by the Novellini Product Lifetime Guarantee. Our guarantee is valid only if used with Novellini products and does not cover installation.

Timber Floor – Guidelines

Mono Deck - **How to Specify**

Designed for use with large format tiles, Mono Deck is a 'trimmable on site' wetroom base for timber floors, with a one-way fall towards a linear drain, therefore eliminating the need for diagonal tile cuts.

When choosing the correct kit please take the following into consideration:
- Size of the required shower area
- Position of the drain – on the long wall or short wall
- Number of traps – 1, 2 or 3
- Finish of the linear grill – Stainless Steel, Matt Black or Tile-Infill
- For grill lengths see Mono Kits on p15
- Urgency - bespoke sizes available in 48 hours

For grill lengths see Mono Kits on p15. Simply choose the nearest kit to the required size of the shower area.
Remember - The width and length can be trimmed on-site to achieve the required size.

Example below shows Kit 8, trimmed to suit a shower area:

- Drainage Component*
- Single Horizontal Trap
- Infill Panel*
- Graded Board*
- G3 Wall Grill
- Stainless Steel Tile Trim

  * Trimmable on-site

KIT 8
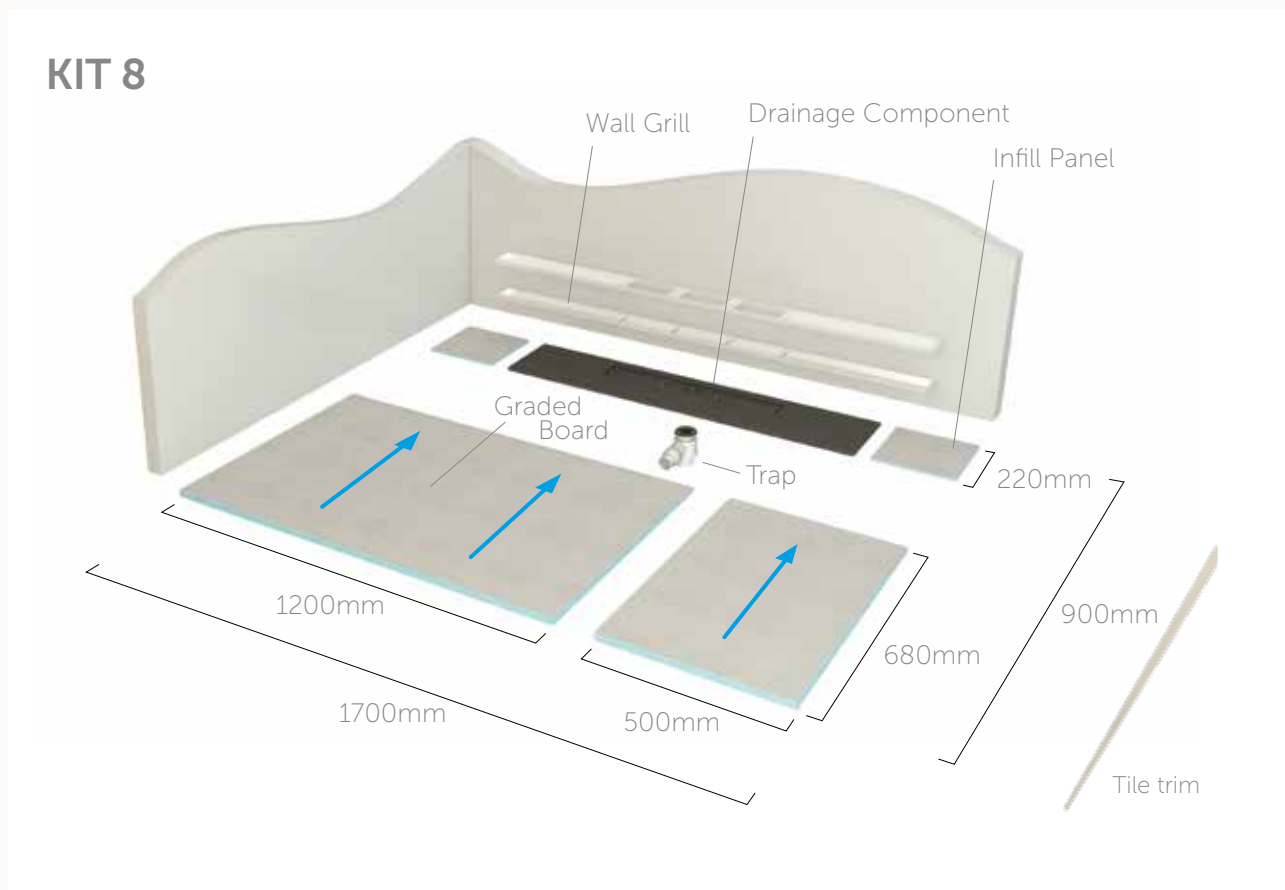

Drainage Component

The Drainage Component is the central element of the Mono Deck System, once in position, the rest of the system is built around it.

1200mm

220mm

- Width can be trimmed on-site
- Available with 1, 2 or 3 wastes
- Single trap up to 24 L/min
- Double trap up to 41 L/min, Triple to 68L/min
- Height of trap only 130mm
- 360° Rotatable trap with 42mm outlet
- Trap can be positioned off-center to avoid joists
- Single trap supplied as standard, additional traps can be added as required, see page 15.

Linear Grill

The Mono Deck is supplied with a Linear Grill, which is neatly positioned against the wall, therefore eliminating the need for angled tile cuts. The grill will be supplied up to 300mm shorter than the overall shower.
i.e. Kit 8 (see p12) has a maximum size of

1800mm x 1000mm with the drain positioned against the long wall, therefore the grill supplied is 1500mm. Simply choose the G1 or G3 in a stainless steel or matt black finish or add a frameless grill if you have a coloured taps (such as gold) or shower screen frame.

Drain positioned against the long wall.
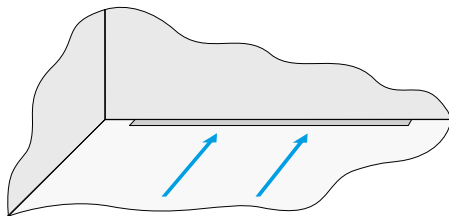

Drain positioned against the short wall.
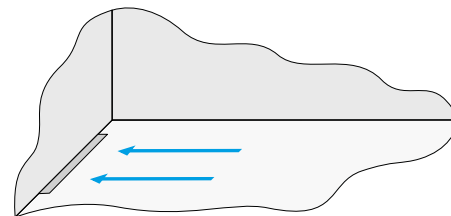

Graded Board

The Graded Board provides an easy to install one way-fall towards the linear drain. Manufactured from high density XPS, they are trimmable along both dimension A & B, allowing a shower area to be created of almost any size.

- 22mm to 11mm gradient
- Trimmable
- High compressive strength
- Supplied with matching colour tile trim
- Fixing washers included
- Easy to install - no angled tile cuts

For full details of waterproofing for timber floors see page 20-21.

Timber Floor - **Mono Deck**

Features of a Mono Deck

The Mono Deck has a single slope one-way fall and can be installed with the linear drain positioned against the long wall or the short wall. The features of a Mono Deck are summarised below:

- Single slope one-way fall
- Create a shower area almost any size
- Easy to install
- Easy to tile using large format tiles

- Llinear grills in various lengths & finishes
- Easy grill removal for cleaning
- Bespoke grills available
- Lifetime Guarantee

Drain position

Positioning the drain against the wall provides a one-way gradient within the shower, ensuring the user is not standing on the drain. This also omits the need for diagonal tile cuts, giving a more stylish look which is both easier to install and maintain.

Timber Floor - **Waterproofing**

A guide to Waterproofing your wetroom

New corner section

Wallsafe Reinforcing Tape

Wall tiles

Wallsafe

Floor Membrane

Floor tiles

Floor Primer

The importance of Waterproofing

The primary concern for anyone choosing to create a Wetroom is whether the floor or walls will either absorb, or worse let water through. Through our painstaking research and development we have created a system that is guaranteed, not just for a few years, but for life. The two components of this system are firstly the floor membrane and secondly the wall membrane, which are the key products for waterproofing the wetroom floor and walls.

We offer two self adhesive waterproof solutions for the floor membrane designed for use prior to the application of ceramic tiles and natural stone onto timber and solid floors in wetrooms:

- **Tilesure** is an evolution of our popular Tilesafe membrane which has been the professional's choice for over 15 years in both the commercial and domestic sectors. Developed specifically for use in bathrooms and wetrooms, Tilesure is comprised of a 1.4mm butyl based membrane with a copolymer top layer, which provides an excellent surface for the adhesion of natural stone, porcelain and ceramic tiles. Tilesure is quick and easy to apply, providing a consistent waterproof layer, guaranteed not to leak.

Tilesure also acts as a decoupling membrane by uncoupling the floor tiles and accommodating movement in the substrate, within a thickness of only 1.4mm. This omits the requirement for a traditional decoupling mat.

- **Floorsafe** – developed as a light weight, easy-fit, domestic product, is a cold-applied self-adhesive membrane which consists of a thin rubberised butyl waterproof layer with a fleece top surface.

For walls we recommend **Wallsafe**:
- A flexible single application paint-on waterproofing membrane, applied to the wall surfaces prior to the application of ceramic tiles and/or natural stone in wetrooms.

Application

For timber floors we recommend that either floor membrane, Tilesure or Floorsafe, is applied to the entire wetroom floor or at least to a distance of no less than 1 metre from the shower area. Wallsafe should then be applied to the walls of the shower area and overlapped onto the Reinforcing Tape.

Floor Membrane Kits

Choose from either Tilesure or Floorsafe kits:

Tilesure Kit offers the following features:
- Suitable for timber and solid floors
- Decouples up to 12mm
- Compatible with silicone sealants
- Self-adhesive - quick and easy to apply
- Ready to tile immediately

Floorsafe Kit offers the following features:
- Suitable for timber and solid floors
- Self-adhesive - quick and easy to apply
- Ready to tile immediately

Tilesure 5m² Kit

Concrete Floor – **Guidelines**

The Novellini wetroom for solid floors

Floor build-up

Our range of linear drains has been developed specifically for concrete or screeded floors and can be used on concrete slabs, planks and block and beam floors.

The key feature of the Linear Floor Drain is its height - the total height from the base to the top of the trough being **only 55mm** (see image below), making it perfect for today's modern construction methods.

The drain incorporates a unique 'waterless trap' which has a lifetime guarantee and has been granted BBA approval. For details see below.

Novellini Wetroom floor systems are suitable to be installed in combination with electric underfloor heating (max specification 150 watts/sq metre).

LINEAR GRADED BOARD

NOVELLINI WALLSAFE MEMBRANE

CONCRETE WALL DRAIN WITH G3 GRILL

SLAB

ONLY **55mm** DEEP
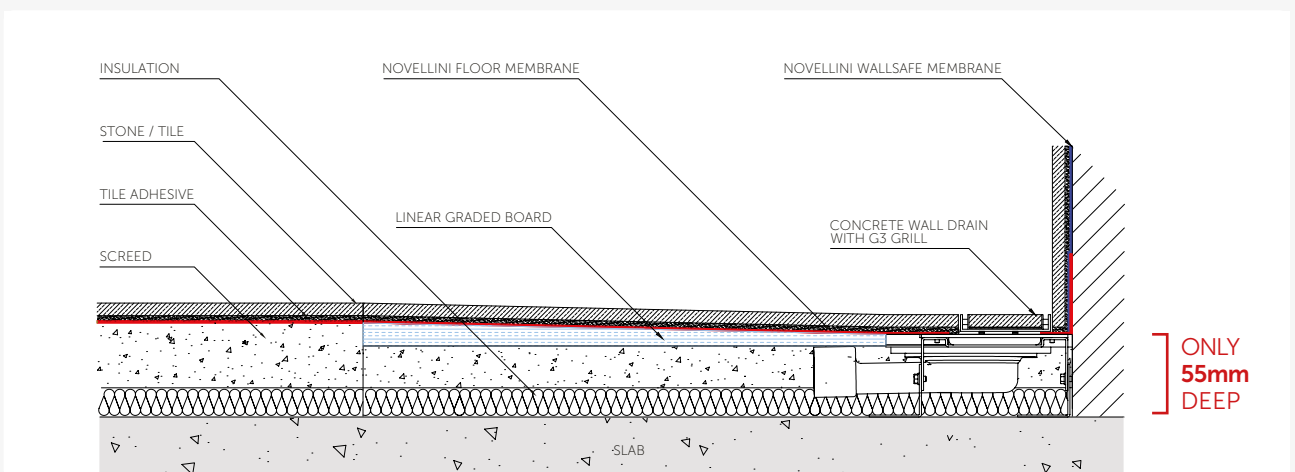

Waterless Trap

All drains are available with one or two traps and a choice of stylish grill finishes. The trap has been specially designed with a spring loaded mechanism which keeps the trap sealed when not in use. This ensures that even when left unused for prolonged periods the trap cannot dry out, making it ideal for situations where the shower is not in everyday use. The smart design of the linear trough allows the waste position to be rotated through 360° enabling installation in most scenarios with ease.

BBA Approved

Four simple steps to order your Concrete Floor solution

Uno4 Drain
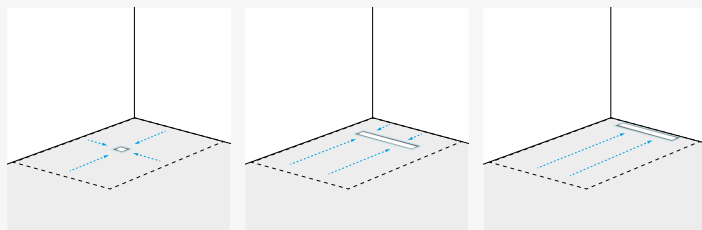

Flow rate up to
24 L/min

Linear Floor Drain

Flow rate up to
56 L/min

Linear Wall Drain

Flow rate up to
56 L/min

1 Drain and Grill

The gradient is formed within the screed, typically 12mm from the finished floor level to the drain.

All drains feature a multi-directional outlet for ease of installation.

Linear Drains are available with either Single or Double outlet depending on the flow rate required. Linear Drains are available in several lengths - see page 21 for details.

Choose either:
- Uno4 Drain - for a four-way fall
- Linear Floor Drain - for a two-way fall or
- Linear Wall Drain - for a one-way fall

2 Graded Board and Tile Trim

Use the Graded Board to provide a pre-formed consistent gradient towards the drain. For all Linear Drains it is important to order a trim detail to define the edge of the wetroom area.

3 Floor Membrane Kit

It is essential to ensure your concrete floor wetroom is correctly waterproofed using a Screedsure Floor Membrane Kit.

Screedsure

Concrete Floor - **Waterproofing**

A guide to Waterproofing your wetroom

Wallsafe Tape

Wall tiles

Wallsafe

Screedsure Membrane

Floor tiles

Screedsure Primer
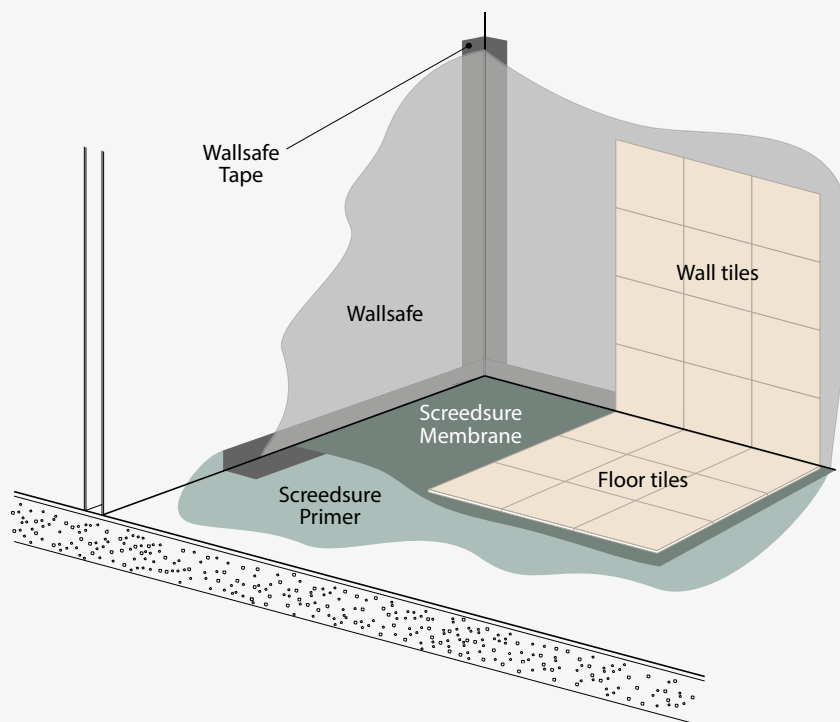

The importance of Waterproofing

The primary concern for anyone choosing to create a wetroom is whether the floor or walls will either absorb, or worse let water through.

Through our painstaking research and development we have created a system that is guaranteed, not just for a few years, but for life.

The two components of this system are Screedsure and Wallsafe - products for waterproofing the wetroom floor and walls.

Screedsure is a copolymer self-adhesive waterproofing membrane specifically designed for use onto screeded and other solid floors in wetrooms and bathrooms.

Screedsure is comprised of a 1mm butyl based membrane, with a fabric top layer, providing an excellent surface for the adhesion of natural stone, porcelain and ceramic tiles.

Screedsure is quick and easy to apply, providing a consistent waterproof layer, guaranteed not to leak.

For walls we recommend **Wallsafe**:
A flexible single application paint-on waterproofing membrane, applied to the wall surfaces prior to the application of ceramic tiles and/or natural stone in wetrooms.

Application

For solid floors we recommend that the Screedsure membrane is applied to the shower area plus an additional one metre in either direction.

Wallsafe should then be applied to the walls of the shower area and overlapped onto the Reinforcing Tape.

3 Select **Membrane Kit**

4 Select Wall **Membrane & Tape**

Floor Membrane Kit

- Suitable for solid floors only
- Self-adhesive - quick and easy to apply
- Ready to tile immediately
- Ideal for fast track construction
- Supplied as a kit
- Factory controlled thickness
- Compatible with electric underfloor heating up to 150kw per m^2

Screedsure 5m^2 Kit
500ml Primer, 10m Reinforcing tape, 5m x 1m Membrane, 290ml Jointing Compound 4 x Pre-formed corners

▶ Glass

Selecting your glass

Considerations when selecting Glass

Selecting your screen is a personal choice and with our range of thousands of combinations, we are confident we can provide a layout to suit your requirements.

From raw materials through to semi-processed goods and assembly of the various components, each manufacturing stage is carefully planned, monitored and tested to ensure the highest levels of quality required by a global market.

Easy to keep clean

Each glass panel is treated with 'crystal clear' treatment which reduces build up of limescale leaving the glass mark free.

Safety Glass
All our products are designed to meet the latest EU quality and safety standards.

CRYSTAL CLEAR T R E A T M E N T

Glass

Kuadra H Squares & Stripes

The impact of a bathroom in which strong shades of black are used is unequalled; this latest interior trend is inspired by the robust industrial look of yesteryear.

Black is a powerful, elegant and luxurious colour. It enhances shapes and emphasises contrasts. Black also radiates energy and vitality.

The glass options shown in this brochure are a suggestion, for our complete solution please visit: www.novellini.co.uk

▶ Glass

Young - the complete enclosure for corner or alcove

Benefits of the Young range

Combining minimalist design with strength, Young enclosures exude style and quality with their low profile frame, robust door hinges and metal door handle for ease of operation. With no door thresholds they are particularly suitable for installation directly on to tiled floors making them perfect for wetroom installation.

Young doors open inwards as well as outwards, enabling you to fold the shower enclosure back when not in use - great for saving space in smaller wetrooms.

The glass options shown in this brochure are a suggestion, for our complete solution please visit: www.novellini.co.uk

Young

Young Corner – two doors, both hinged

Create your enclosure by ordering two sides. Details and prices below are per side.

Notes for all Young screens

- All young screens are reversible or have left or right hand options.
- All Young screens feature clear glass with Crystal Clear treatment and a chrome frame.
- A 100cm horizontal support bar is included with the side panel. See page 31 for more options.
1. The width of the screen allows for up to a 40mm variation in the wall.
2. The support bar, included in every pack, adds a further 1cm in height to the figures indicated.
3. 6mm safety glass.

New ideas – further details on novellini.co.uk

Inspiration

If you are looking for something a little more creative from your bath or shower room then we have something special to inspire you.

Investment in in-Art HD glass printing technology has enabled us to create our latest range of contemporary shower screens.

These designs allow you to create a feature wetroom that is way beyond ordinary.

In addition to the shower screens we also produce our own bathroom furniture. By selecting from our Divina Bath range and Iotti furniture you can complete the look for your bespoke bath or shower room.

The image above features baths from our Divina range.

All furniture is courtesy of our Lotti collection and the shower head and controls are 'Easy Shower'. The glass is Kuadra H with Black Edging.

The two glass options below show our creative flair with the Kuadra H 'Grid' to the left and Kuadra H 'Wires' to the right.
